

APEX SAFETY GLASSES

Malta Dynamics APEX Safety Protective Glasses are ANSI impact rated to meet the ANSI/ISEA Z87.1-2020 standard. They feature a stylish modern design with curved lenses that contour to the shape of the eye and face for a superior fit and added protection. The large lenses give a full, clear view of surroundings while providing lightweight and comfortable eye protection. The molded nose bridge and flexible temple tips make for a universally snug and comfortable fit and can be worn with or without prescription glasses on underneath. The singular top rim makes it easy to keep the lenses clean with soap and water, so they'll be ready to keep your vision clear and your eyes protected time after time. The premium lenses are anti-scratch, anti-fog, and 99.9% UV resistant (tinted models only), so you can wear them confidently and safely in virtually any setting.
