

SOCKET GUARDRAIL BASE

Socket Base Assembly with Pins

Renowned as the lightest guardrail base in the USA at just 58 lbs., the Socket Guardrail Base was designed for easy nesting and stacking. The Socket Guardrail Base stands as the ultimate free-standing fall protection system, requiring no roof substrate penetration and ensuring exceptional durability. It facilitates safer lifting, reducing the risk of soft tissue injuries on job sites. With a significantly reduced installation time, the added convenience allows a single person to comfortably carry the base.

Powder-Coat Yellow Part ID: 71094

Galvanized Part ID: 71094G

COMPLIANCE: OSHA 1926.502 & CSA Z259

Key Features

- For temporary or permanent applications
- No drilling or tools required
- Fits easily between standing seams
- Product Weight: 58 lbs.
- Meets compliance: OSHA 1926.502
- Test to meet CSA Z259 standards
- Added benefits: toe-board slots, protective rubber footing, carrying hand hold slot
